- Worked as an Associate Software Engineer at Athena Global Technologies Ltd from May 2015-Nov 2016.

Technical Skills

- Microsoft Technologies: ASP.NET, C#, MVC.
- Database: MS-SQL Server, My SQL, XML, Entity Framework.
- Web Technologies: CSS, HTML5
- Web Services: Web Api, ADO.NET, Ajax
- Source Control: SVN, Azure DevOps
- Others: MVC
- Scripting Languages: Javascript, JQuery, Angular 9, React JS

Education Background:

- Completed B. Tech in DRK IST (JNTU) Hyderabad.

Project: 6

Name: JCAS (**JABIL Corrective Actions System**)

Client: JABIL

Tools: Visual Studio 2017, MS SQL

Environment: C#.Net, MS SQL, Angular 9, CSS, HTML5, Web API, Entity framework

Team Size: 5

Description:

JCAS is an auditing tool used by JABIL internal to audit various product. It is used in identifying the problems and allocating them to the respective teams and monitoring the solution till it is delivered.

Responsibilities:

- User Stories development assigned in sprint.
- Involved in Requirement gathering, Analysis and designing.
- Participating in the client calls.
- Unit Testing & Bug fixing.

Project: 5

Name : EMS(**Energy Management Solutions**)

Client : Prokarma

Duration : On going

Tools : Visual Studio 2015, My Sql

Environment : C#.Net, My Sql, Angular 2, CSS, HTML5, Web API, JQ Widgets

Team Size : 20

Description:

Energy Management Solutions (EMS) is a product that offers services to various clients like Sodexo, Google, Apple to manage their utility expenses with detailed reports of their usage, spend, greenhouse gases report, usage based on weather.

Responsibilities:

- User Stories development assigned in sprint.

- Involved in Requirement gathering, Analysis and designing.
- Participating in the client calls.
- Unit Testing & Bug fixing.

Project: 4

Name : mData Tool Server Instance
Client : Sony Entertainment
Tools : Visual Studio 2013, SQL Server 2012
Environment : ASP.Net, C#.Net, SQL Server 2012, MVC, CSS, JQuery, HTML5
Team Size : 3

Description: mData Tool server instance is a web based multi user tool. Apart from the Basic functionality, the web-based tool has the below mentioned features:

- User management that allows controlling the users (create/edit/delete) who should be allowed to use the tool.
- Audit Trail gives a step by step documented history of actions performed by users during tool usage. Admin can keep track of what is going on inside the tool.
- Responsive design is provided for optimal viewing and interaction experience through easy reading and navigation across a wide range of devices.

Responsibilities:

- Developing application using MVC framework
- Database design, creating data objects and required stored procedures
- Delivering high quality code that is maintainable and readable and adheres to coding standards
- Unit Testing & Bug fixing

Project: 3

Name : eForms
Client : CCube Solutions, UK
Environment : Win Forms, C#.Net, JQuery, JavaScript, Third party controls, XML, Web Services, SQL Server 2008.
Team Size : 8

Description:

An e-Forms designer is an application that allows users to build and maintain electronic forms and publish these forms for use within the browser environments. Necessary tools were provided for creating, revising, publishing and managing forms.

The key functionality includes:

- Integration with back-end users to validate information which would help reducing errors and keystrokes.
- Providing control options such as pick lists, radio buttons and check boxes where ever it is required.
- Facilitating designing and maintaining electronic data entry screens complete with data validation rules and page navigation within multi-page forms.
- Enabling the users filling in forms to see the results, e.g. summary display, PDF output, etc. which can be e-mailed out and/or printed.
- eForms is focused on providing rich UI to users through controls like Slider bar, Mobiscroll Time picker, Editable Grids, Graphical Charts, Shape controls.

Project: 2

Name : MData Tool Console for Jenkins.
Client : CSony Entertainment
Environment : Win Forms, C#.Net, XML.
Team Size : 2

Description: MData Tool for Jenkins is a console application. MData tool executable can be integrated with Jenkins by creating jobs for automated build process. A separate UI based tool is provided to configure Asset & Text rules for each platform and email addresses. MData tool exe validates game against configured rules and sends reports to configured stakeholders.

Responsibilities:

- Screen Designing and Navigations for rules and email configuration tool.
- Developed business logic to reuse existing Business layer and Data Access Layer
- Delivered high quality code that is maintainable and readable and adheres to coding standards
- Unit Testing & Bug fixing

Project: 1

Name : mData Tool Desktop version.
Client : Warner Bros,Electronic Arts,Gear Box
Environment : Win Forms, C#.Net, XML, Web Services.
Team Size : 2

Description:

mDataTool is a Windows based tool. mData has the capability to verify the artwork for any Game Platform. The Tool reads the properties of the artwork assets & excel sheets text and validates them against the rules specified for that particular Game Platform and for that particular artwork asset type. It then records the actual values as well as the expected values. It compares the values and evaluates whether a particular Validation rule is Passed or Failed.

The Tool displays the “Summary report” of the validation process. All the reports generated by mData Tool can be saved in PDF format and they can also be emailed to concerned parties through the Tool’s email facility.

Responsibilities:

- Screen Designing and Navigations.
- Creating Business layer and Data Access Layer
- Written code for retrieving and storing data through XML files.
- Implementing licensing logic through web services.
- Delivered high quality code that is maintainable and readable and adheres to coding standards
